PROJECTS

1. Online Auction System With AI
This project is help to buy or sell any 2nd hand product through this application from home with the help of bidding/Negotiation as well as with security.
This Application will solve all the problem which comes with other application while buy or sell 2nd hand product like:-

a)Fraud detection
(CM Kejriwal Daughter got Fraud through OLX of loosing 34000 ruppes while buy sofa set)
b)Seller account verification
(seller can doing fraud and delete their account easily)
c)Return policy
(no return policy in other 2nd hand product selling application)
d)Online bidding
(no application provide bidding on product/Negotiation while buy product)

2. Car Rental System
The Car Rental System project is the solution for car renting companies where anyone can rent a car, and the administrators are able to organize and supervise the renting process. Due to the capabilities of Java, OOPS Concept, and the Collections , the system maintains the automation of the rental process and the ultimate reliability of the rental business.
Therefore, the Car Rental System is a useful application for any car rental firm that needs to update its organization processes

ANUDIP FOUNDATION

Advance Java Training
Engaged in daily tasks to complete lab works and quizzes in IDEs and Anudip's portal, actively applying Core Java concepts.
Explored advanced topics like JDBC, MySQL, JPA, and Hibernate, incorporating them into projects for practical application.
Actively sought out and rectified mistakes within projects, ensuring they were error-free and visually appealing.
